Chenggang Zhou, New Oriental's Chief Executive Officer, added, "We once again delivered a strong set of results through our execution of the well-proven "Optimize the Market" strategy. During the quarter, we added a net total of 65 learning centers in existing cities and opened three new offline training schools and one learning center in the cities of Baotou, Changshu and Yuci. In the fiscal year 2019, we added a total of 152 new facilities, including 141 new learning centers in existing cities, nine offline training facilities in six new cities and two dual-

We also continued to strategically deepen our investment into the dual-teacher model classes and new initiatives for K-12 tutoring in our pure online education platform, Koolearn.com. With the innovative application of technology in our education services, we are well-placed to continue to capture new business opportunities in lower-tier cities and remote areas.”

Stephen Zihui Yang, New Oriental’s Chief Financial Officer, commented, “Our capacity grew steadily throughout the entire fiscal year, in line with our expansion plan, while we continued to emphasize on improving our operational efficiency. As we enter the fiscal year 2020, we will continue to leverage our online and offline integrated education system across all business lines, and improve efficiency by using standardized, modularized and systemized operating process. We are confident that we will be able to deliver continued margin expansion, and generate sustainable long-term value to our customers and shareholders.”

About Non-GAAP Financial Measures

To supplement New Oriental's consolidated financial results presented in accordance with GAAP, New Oriental uses the following measures defined as non-GAAP financial measures by the SEC: net income excluding share-based compensation expenses and gain / (loss) from fair value change of long-term investments, operating income excluding share-based compensation expenses, operating cost and expenses excluding share-based compensation expenses, general and administrative expenses excluding share-based compensation expenses, operating margin excluding share-based compensation expenses, and basic and diluted net income per ADS and per share excluding share-based compensation expenses and gain / (loss) from fair value change of long-term investments. The presentation of these non-GAAP financial measures is not intended to be considered in isolation or as a substitute for the financial information prepared and presented in accordance with GAAP. For more information on these non-GAAP financial measures, please see the tables captioned "Reconciliations of non-GAAP measures to the most comparable GAAP measures" set forth at the end of this release.

New Oriental believes that these non-GAAP financial measures provide meaningful supplemental information regarding its performance and liquidity by excluding share-based compensation expenses and gain / (loss) from fair value change of long-term investments that may not be indicative of its operating performance from a cash perspective. New Oriental believes that both management and investors benefit from referring to these non-GAAP financial measures in assessing its performance and when planning and forecasting future periods. These non-GAAP financial measures also facilitate management's internal comparisons to New Oriental's historical performance and liquidity. New Oriental believes these

non-GAAP financial measures are useful to investors in allowing for greater transparency with respect to supplemental information used by management in its financial and operational decision making. A limitation of using these non-GAAP measures is that they exclude share-based compensation charge and gain / (loss) from fair value change of long-term investments that has been and will continue to be for the foreseeable future a significant recurring expense in our business. Management compensates for these limitations by providing specific information regarding the GAAP amounts excluded from each non-GAAP measure. The accompanying tables have more details on the reconciliations between GAAP financial measures that are most directly comparable to non-GAAP financial measures.
